

(a) Primary family: directional-information effect and start-state gate

(b) Secondary allele family

(c) Secondary no-memory performance family

■ meaningful scale (-1/32, +1/32): one correct bit or one expected individual
●- line estimate, 95% familywise interval

Primary decision (rule 5): BOUNDED BELOW THE POSITIVE ONE-BIT SCALE; interval wholly inside (-1/32, +1/32): yes
